Software engineer focused on reliable developer tools and clear technical communication.

Experience

Senior Software Engineer Jan 2023 – Present

Analytical Engines Ltd

- Reduced deployment time by **35%** through parallel build stages
- Led 4 engineers in delivering a new release workflow within 3 months

Software Engineer Jul 2020 – Dec 2022

Difference Engine Co

- Improved test coverage from 72% to 91% across 6 services

Education

BSc Computer Science Sep 2016 – Jun 2020

University of London

- Graduated in the top 5% of the class

Projects

Reproducible Release Toolkit Jan 2022 – Present

- Built a cross-platform release pipeline used by 18 open-source projects
- Reduced release preparation from 2 hours to 15 minutes

Publications

Reproducible Builds for Small Engineering Teams Oct 2022

- Published a practical guide to build isolation, artifact verification, and release automation

Skills

Languages and tools

- Rust, TypeScript, PostgreSQL, and GitHub Actions

Engineering practices

- Automated testing, performance profiling, and technical writing

Board and Advisory Work

Technical Advisor, Open Computing Foundation Jan 2024 – Present

- Advise maintainers on release security, contributor workflows, and project governance

Professional Interests

- Dependable developer infrastructure and reproducible software delivery
- Computing history, technical education, and volunteer mentoring
